HEALTH.
LIVELIHOOD.

Non-compliant steel can do more damage than you think.

- Every time you build with non-compliant steel you risk not only human safety, but your reputation and livelihood are also in jeopardy.
- The damage will start if the integrity of your structure fails – you could be liable and the outcome could result in heavy personal losses.
- How do you know your building or construction is safe if you don't know if the materials are compliant?
- Understanding how you can protect yourself is critical. You have the power to refuse to use non-compliant steel.
- Demand ACRS verified materials and ask for the ACRS Certificate of Product Compliance to help check compliance to the required Codes and Standards.
- Protect yourself, your family and your business, and ensure every project using reinforcing, pre-stressing and structural steels has an ACRS Certificate.

**Don't let compliance slip through the cracks.
Demand the ACRS Certificates of Product Compliance.**
